

To Whom it may concern,

Genealogy research enjoyed by many people trying to trace ancestors uses any books, articles, and other printed data to prove or disprove their own work. To make access harder for them seems unfair. Family values has slipped so far in this day and time; I believe that it's time that we embrace our ancestors' trials and triumphs. By passing their family values on to our descendants, we can show the reason that this country became the GREAT COUNTRY IT IS.

Thanks for your time,
Barbara Merrell
