Title:

проект жилого дома для будущей застройки «СолСити РиоСанХуан» в рамках конкурса

Author Name:

YULIYA MOKEEVA

ID Number:

46

Address:

Москва, Малый Козихинский пер., д.12

Description:

Siteless House "All in one" Project concept: building constructive scheme and landscape improvement are combined into the sustainable system. Therefore this project might be built at different sites. A metal rhombic construction is a supporting skeleton of the building and it's also a bearing element for setting solar batteries and sun protection pergolas. Surfaces of solar batteries and pergolas shade the interior of the glass volume and create calm and comfort lightning atmosphere. Land limited by metal constructs basement is the courtyard of the house. Besides this territory takes part of whole landscape. That solution gives an opportunity to plan different combinations of this type of houses. In that case they're connected by pedestrian bridges.
