Title:

Principles and objectives for the creation of software to protect the health of car drivers

Author Name:

Фёдор Орлов

ID Number:

588

Address:

432035 Russia Ulyanovsk street Vareikis street 11 kV, 36

Description:

Protection of health of the driver by using electronic sensors vmontiruemyh braided steering. Direct contact with the hand, gives the ability to scan more accurately the parameters of health vodetelya. In case of deterioration of health, sensors detect the parameters that begin to change dramatically. The program warns the driver of the need for medical care. If, within 5 seconds of the driver does not react to the warning, the computer stops the car, activate the emergency parking lights. According to the framework laid down, sends a message to the 911 or other medical facilities. The message transmitted information: - Full name of the driver's status (parameters) and its location!
