ECP—ESSENTIAL CHANGE PROGRAM The Essential Change Program ECP is designed to work as an outside examiner or diagnostic, is the study of how we think, believe, do and experience our world around us. ECP is a model developed to help us understand the way how we experience the world via the language of the mind (sights, sounds, sensations, smells), and at the same time ECP consists of a set of powerful techniques for rapid and effective behavioral modification that help with the development of personal abilities so that we can be more productive in the society whether we choose a job or self-employment and how to give a better contribute to the community. تعزز برنامج
