"orphan works" comments

Dear Reader,

I am commenting on Notice of inquiry RE: orphan works.

I have been using computer software for over 10 years as a part of my job. I sometimes find software applications that were created in the past that are useful to a problem I am trying to solve. But I can not always contact the owner/patent holder of this software and thus can not use the software as a business solution.

Please make efforts to free up useful orphan works.

Thank you,

John Van Dyke
