

There is a wonderful book called "Odyssey: A Daring Transatlantic Journey," by the late actress Susan Oliver. It is nearly impossible to find a copy (Amazon lists some used for about \$100 apiece but the sellers had already sold them when I contacted them.)

I had the idea of scanning in a copy that I had read on interlibrary loan and making it available for people to read for free on the web, but all my attempts to contact the publisher for permission met with no information. The original publishing company had split apart, been bought, etc. After repeated requests to the addresses I could locate for parts of them, I did get one or two "not us," replies, but I still have no idea who can give me permission to do this or not.
